ACT. PROTECT. COMPLY.

Lockout Tagout Safety Ltd

We stem from a local family business established in 1883, and specialising in general security and safety, within Industrial Teesside, UK. However, our work in this side of the industry has helped us to realise the **niche service** which provides modern solutions for industrial plant safety, i.e. lockout/tagout, which instructs workers and their employers to keep to safe systems of work **world wide**.

William Appleyard, 1883

Phrases such as "Accidents will happen" give no comfort to the families or employers of those who lost their lives or were injured during the course of their employment, and we prefer to adhere to the belief that "Accidents can be prevented." **Lockout Tagout Safety Ltd provides** the devices to stop such accidents.

Statistics produced by the UK Health and Safety Executive show that in the year 2008/9 180 workers were killed at their place of work, 131,895 other injuries were reported and 246,000 reportable injuries were recorded.

Our operational mission is simple – namely to provide a comprehensive range of safety and security products which give peace of mind to you, your staff and your visitors, and which prevent you from adding to the tragic accident statistics.

All businesses are obliged to operate under a wide range of codes of practice and regulations in respect of safety. Failure to do so can result in legal action and severe penalties for the employer. Lockout Tagout Safety Ltd exists to provide you with a guide to those regulations covering your business and the nature of its operations, and to make available to you legally approved safety products which you can utilise with confidence. For example, according to the OSHA standard 1910.147 - Lockout Tagout, it is important that there is no unwarranted duplication of keys. As the number of locks increase so does the complexity of tracking keys. Lockout Tagout Safety Ltd are the expert at managing your key changes and ensuring fit for purpose safety padlocks.

We are premier providers of world leading lockout tagout equipment. Lockout Tagout Safety Ltd is a popular provider of quality Lo-To products to both UK and World markets.

Online Ordering and Prices

There are various ways to obtain up to date prices, (ex VAT) :-

- 1) **Order help line number** +44 (0) 1642 244017
- 2) **Email and request quote** with large order volume discounts available.
- 3) **Instant Fastpath** the price by going onto our website www.LockoutTagout.co.uk and follow this simple step:

Find web prices in just one step:-

After you have found the product you are interested in within this catalogue, type the product number into this search field on our website and that's it. Price found!

Legislation

Corporate Manslaughter and Corporate Homicide Act 2007

Thousands of workers get killed or injured every year while repairing or maintaining industrial equipment and machinery. These accidents often occur as a result of the uncontrolled release of energy. In order to stop this from happening, several policies exist within Europe requiring that all energy sources are turned off and 'locked out' while machines are being serviced or repaired.

What is it?

Lockout Tagout is a planned safety procedure that disables the energy supply of industrial machinery and equipment whilst servicing, maintenance work or repairs are in progress. The aim of this system is to effectively protect workers from the dangers created by live machinery or electricity, therefore lowering the overall level of risk when working with this equipment.

Why Lockout/Tagout?

- Provides safety when completing maintenance, cleaning or carrying out repairs
- Prevention of injuries
- Prevention of damage
- Generally helps the evasion of errors
- It is a useful safety procedure which clearly communicates the risks in the workplace and how easily these dangers may be avoided.

When you neglect Lockout Tagout you neglect people.

Current Legal Requirements

In the UK the Provision of Work Equipment Regulations – Regulation 19 – Isolation from Sources of energy states: "Every employer shall ensure, that where appropriate, work equipment is provided with suitable means to isolate it from all its sources of energy. Every employer shall take appropriate measures to ensure that re-connection of any energy source to work equipment does not expose any person using the equipment to any risk to his health or safety".

The EU Guidelines 89/655 specify the minimum requirements concerning safety and health while using equipment. Paragraph 2.14 lays down that "every piece of equipment must be fitted with clearly visible devices with which it can be separated from every energy source".

OSHA Regulations (USA)

OSHA regulation The Control of Hazardous Energy (Lockout / Tagout) 1910.147 states that it "requires employers to establish a program and utilise procedures for affixing appropriate lockout devices or tagout devices to energy isolating devices and to otherwise disable machines or equipment to prevent unexpected energisation, start up or release of stored energy in order to prevent injury to employees".

Lockout/Tagout training DVD

Comply with regulations and provide safety training to every member of staff. To ensure that all the relevant members of staff receive safety training decreases both the risk of accidents occurring in the workplace and their associated costs.

Lockout For Life

Learn from other workers' tragic mistakes. This motivational video presents six real-life dramatizations of actual lockout accidents and analyses how they could have been prevented

- Suitable for new and experienced employees

Duration: 19 minutes

Workshops and Training

Call for details on 01642 244017

Lockout Tagout Safety Ltd aims to provide a wide range of resources so that customers can make informed decisions when purchasing safety equipment.

It also ensures that employers and workers can keep up to date with the latest legislation on safety in the workplace.

Legislation

Establishing a good Lockout/Tagout programme requires 3 basic steps:

1

Develop a Written Program

Identify and write out all procedures for the control of hazardous energy, planning for scenarios such as the preparation for shutdown, equipment isolation, Lockout/Tagout application, release of stored energy and finally the verification of energy isolation to each piece of equipment.

2

Training Employees

It is crucial that both affected and authorised employees are trained in the specific energy control procedures established by the company. Verification of this training is required.

3

Implement the Program

As well as developing and identifying format written procedures and training employees, Lockout Tagout Safety Ltd offers a selection of products including padlocks, tags, signs and lockout devices to help you implement lockout procedures for many different energy sources, including: electricity, pneumatics, steam, gas, liquids and many others.

General Lockout Procedure

The following steps should be included in your Lockout Tagout procedure in order to aid personnel in safe completion of work activity.

Issue a work order (or similar procedure), which determines the task and the equipment that is to be locked down.

Notify the affected employees that Lockout is about to occur, including the operator of the equipment.

Limit the work area, if permissible, by erecting a safety perimeter.

Prepare for shutdown by reviewing details of the energy source, hazards, and your company's control procedures.

Shut down the equipment/machinery using the normal, safety procedure.

Isolate all applicable energy sources.

Apply padlocks to the energy isolating devices.

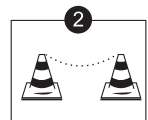

Apply tags in order to provide information regarding the lockout of isolation devices & switches.

Dissipate, then confine and block the residual energy that may be present.

Apply padlocks to the residual energy blocking devices.

Apply tags in order to provide information regarding the lockout of the residual energy devices.

Verify the absence of energy by using the most reliable and safest means possible, e.g. start-up test.

Mechanical Risk: Universal Risks

Universal Valve Lockout: One device does it all!

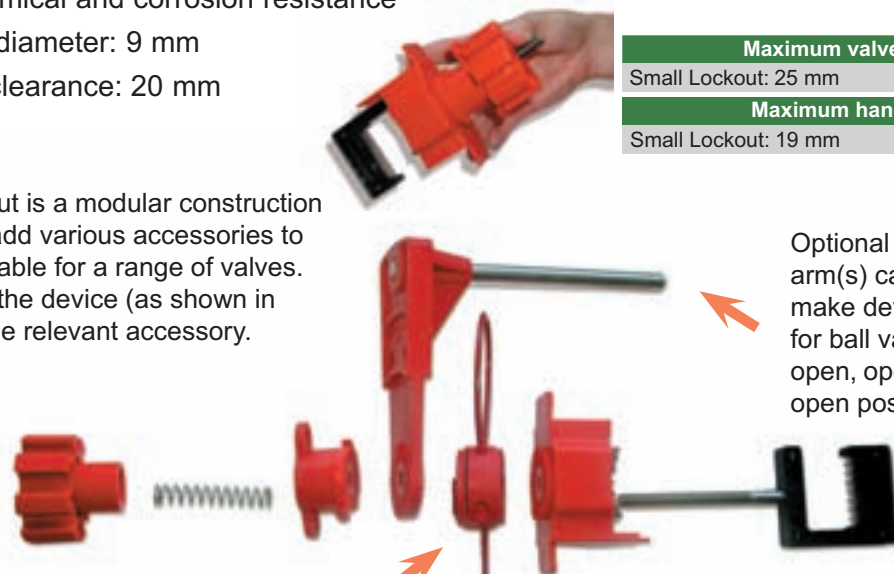

The Universal Lockout device is a modular system which enables you to lock out valves of different types and sizes. No other device offers such flexibility and security. There are two sizes available: large and small.

- Modular system makes your investment economical and flexible
- Can be used to lock out large levers, T-handles and other hard-to-secure mechanical devices
- New open-ended clamp fits over closed rings, wide handles
- Locks out valves in open and closed positions
- Made from industrial-grade steel and nylon for rugged durability, chemical and corrosion resistance
- Max. shackle diameter: 9 mm
- Min. shackle clearance: 20 mm

Order Ref.	Description
050924-BR	Small Universal Valve Lockout Base Clamping Unit
050899-BR	Large Universal Valve Lockout Base Clamping Unit
065402-BR	Small Blocking Arm
065403-BR	Large Blocking Arm
051395-BR	Cable attachment with 2.44 metre sheathed cable Cable diameter 3.25 mm

Maximum valve handle width	
Small Lockout: 25 mm	Large Lockout: 41 mm
Maximum handle thickness	
Small Lockout: 19 mm	Large Lockout: 31.75 mm

The Universal Lockout is a modular construction where the user can add various accessories to make the device suitable for a range of valves. Simply disassemble the device (as shown in picture) and slot in the relevant accessory.

Optional blocking arm(s) can be added to make device suitable for ball valves in half-open, open or partially open positions

Cable attachment can be added to make device suitable for locking off gate valves

Clamp attaches to butterfly valve lever, preventing trigger handle from being squeezed. Valve cannot be repositioned!

Use blocking arm to lock out quarter-turn ball valves

Use cable attachment to lock out gate valves

Use two blocking arms to lock out 3-, 4- or 5-way valves, or to lock valves in the throttled position for operational control

Lockouts for valves in **closed** position

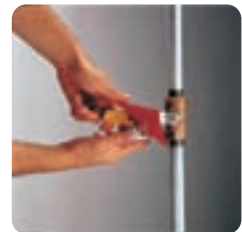

Brady® Ball Valve

- Locks quarter-turn ball valves in OFF position
- Fits virtually any valve lever up to 76 mm
- Very compact and lightweight solution
- Available in 2 sizes
- Packaging: 1 piece

Mechanical Risk: Ball Valves

Handle-on Ball Valve Lockout

Steel pin fits behind stopper bar

Jaws clamp tight on valve stop

Technical Features

- Aluminium & Steel composite body
- Heat resistance
- High chemical resistance
- Corrosion resistance
- Fits 6.35mm to 100mm ball valves

Handle Ball Valve Lockout fits into virtually all manual, quarter-turn ball valve handles to protect against accidental valve opening.

- Clamps tight on handle stop to prevent handle movement
- Works on a wide range of ball valve sizes
- Works on insulated pipes and in close quarters
- Ergonomic to optimize tightening on valve handles
- Durable aluminium & steel construction defies corrosive environments and temperatures up to 532 degrees
- Lightweight and compact for easy carrying and storage
- S3068MLP is available with labels in Czech, English, French, Spanish, Flemish/Dutch, German, Italian, Japanese, Mandarin, Chinese, Polish, Portuguese & Russian.

Ball Valve Lockout Option	ODD Orientation	Pipe Material Installation	Tight Clearance
<p>Order Ref. S3068MLP</p>			

Seal Tight™ Ball Valve Lockout

The solution that positively shuts off energy

Provides Universal Fit for Valve Applications and Diameters

- Another exclusive Master Lock® Safety Series™ lockout device, the Seal Tight™ device works on virtually all valve sizes and in all applications
- Patent-pending innovative design eliminates the risk of valve operation. With Seal Tight™, remove and store the handle and conceal the valve stem for secure lockout
- Works in virtually all valve installations – metal and PVC valves, insulated pipes, pipes mounted close to a wall or ceiling, and valves with tight access due to close proximity of other valves or pipes
- Temperature resistance (-40° C to 121° C).

Fits Tight Clearances
Easy to use Universal Fit

Order Ref.
468L-ML

Adjustable Gate Valve Lockout

- Adjusts to fit gate valves from **2.5 to 16.5 cm**
- **One device for most gate valves**
- Replaces 3 conventional gate valve lockouts = reduced costs
- Durable polypropylene
- Resistant to extreme temperature changes from -45 to 182°C
- Max. shackle diameter: 7 mm
- Min. shackle clearance: 20 mm
- Packaging: 1 piece

Order Ref.
064057-BR

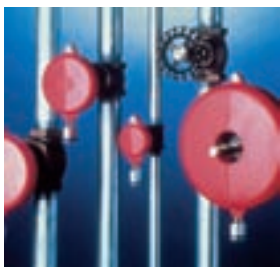

Standard Gate Valve Lockout

- Locks out gate valves from 2.5 to 32 cm
- Made of durable polypropylene – superior impact & chemical resistance
- Withstands temperatures from -30 to 150°C
- Available in 5 sizes and 4 colours
- Comes with danger labels in English, Spanish and French
- Max. shackle diameter: 6.5 mm
- Min. shackle clearance: 38 mm
- Recommended lock:
 - Safety Packlock (page 32)
 - Safety Lockout (page 43)
- Packaging: 1 piece

Unique knockout feature: can be removed by hand to accommodate "rising stem" gate valves

WHY USE DIFFERENT COLOURS?

- **Valves in open or closed position:** red = open, green = closed
- **Indicate risk levels:** red = high risk, blue = low risk
- **Indicate substances flowing through a valve:** yellow = gas, green = water
- **Indicate different maintenance teams:** red = electricians, blue = mechanics

Mechanical Risk: Gate Valves

The exclusive, patent pending Master Lock® gate and ball valve lockout devices work in difficult applications like tight spaces and insulated pipes.

Rotating Gate Valve Lockout

Outward/Inward Rotation Allows for Easier Installation & Secure Lockout

- Tough, lightweight, dielectric Zenex™ thermoplastic bodies withstand chemicals; perform effectively in extreme conditions temperature range (-47° C to 177° C)
- Surrounds the valve operating handle to protect against accidental valve operation
- Unique, rotating design allows for easier installation in confined space applications
- Center knockout can be removed for rising stem gate valves
- Each size rotates into itself and nests within the next larger size to save space in storage
- Multiple workers can apply their personal safety locks
- Complete with high-visibility permanent safety labels (English, French & Spanish) that can be written-on to identify the responsible person, then erased for the next job.

Pressurized Gate Valve Lockouts

Fits Pressurized Gas Valves

- Surrounds the valve handle to protect against accidental valve operation
- Design works with valve guard in place
- Fits virtually all pressurized gas valves up to 7.6 cm diameter
- Compact size easily stored when not being used
- Includes Danger labels in English, Spanish, and French
- Accepts any Master Lock® or American Lock® Safety Padlock.

Order Ref.	Description
S3910-ML	Pressurized Gas Cylinder Lockout

Zenex™ is a registered trademark of Master Lock®

Mechanical Risk: Cable Lockouts

Adjustable Cable Lockout

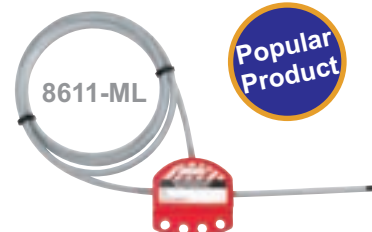

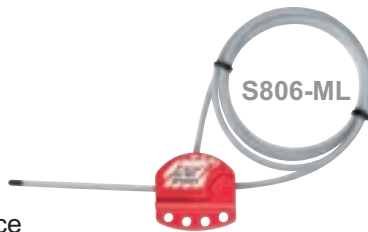

Infinitely Adjustable for a secure fit every time

- Integrated safety hasp and cable is ideal for multiple circuit breaker panel and side-by-side gate valve lockouts
- Tough, flexible multi-stranded 6.35 mm dia. Steel cable is insulated with a clear vinyl coating
- Feed the cable end through the points to be locked out, then back through the lockout body Cinch it tight to remove any slack with the patented locking feature
- Tough, lightweight Zenex™ thermoplastic body withstands chemicals; performs effectively in extrem conditions (-47°C to +149°C).

Order Ref.	Description
S806-ML	Adjustable cable lockout 1830mm - ø 4 mm cable
8611-ML	Adjustable cable lockout with 1.80 m - ø 6mm cable
8615-ML	Separate 4.50 m - ø 6mm cable for use with 8611-ML

Power Plant No1 Choice

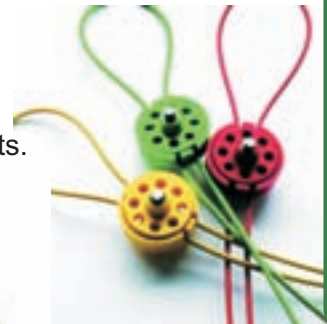

PRO-LOCK II® Cable Lockout Device

- Can only be opened and locked by using special tool (not included)
- Compact and lightweight
- Moulded from an impact polymer polypropylene with stainless steel internal parts.
- UV stabilised
- Temperature resistance range: -50°C to 55°C
- Diameter PRO-LOCK: 50 mm
- Cable length: 1.50 m
- Max. shackle diameter: 6.5 mm
- Min. shackle clearance: 20 mm
- Packaging: 1 piece

Mechanical Risk: Cylinder & Pneumatic Lockouts

Cylinder Tank Lockout

- Used to lockout cylinder tanks, including propane tanks on forklift trucks and stand alone propane tanks
- Valve stem hole is 31.5 mm in diameter
- Apply with ease to prevent access to the valve handle
- Designed to fit in tight spaces
- **2 padlocks can be applied**
- Max.shackle diameter: 6.5 mm
- Min.shackle clearance: 20 mm
- Packaging: 1 piece

Order Ref.	Description
046139-BR	Cylinder Tank Lockout

Gas Cylinder Lockout

- Prevents access to the main cylinder valve
- No need to match your lockout device to varying diameters and threads of cylinder caps
- Accommodates neck rings up to 88 mm diameter
- Install in seconds to save time
- **1 padlock can be applied**
- Max.shackle diameter: 7 mm
- Min.shackle clearance: 20 mm
- Packaging: 1 piece

Order Ref.	Description
045629-BR	Gas Cylinder Lockout

Pneumatic Quick-Disconnect Lockout

- Isolates pneumatic energy without the expense and inconvenience of installing in-line lockout valves
- Device is applied to the male fitting, isolating equipment from all compressed air sources
- Accommodates the majority of 6 mm, 9 mm and 12 mm male fittings
- Hole in centre of device allows for permanent storage on air hose and a loop on the side can be used to hang the hose and lockout device
- Max.shackle diameter: 6.5 mm
- Min.shackle clearance: 20 mm

Order Ref.	Description	Packaging
064221-BR	Pneumatic Lockout	1 piece
065645-BR	Pneumatic Lockout	6/pk

Combine Pneumatic Quick-Disconnect Lockouts with Safety Padlocks (page 30)

Mechanical Risk: All Purpose Lockout & Covers

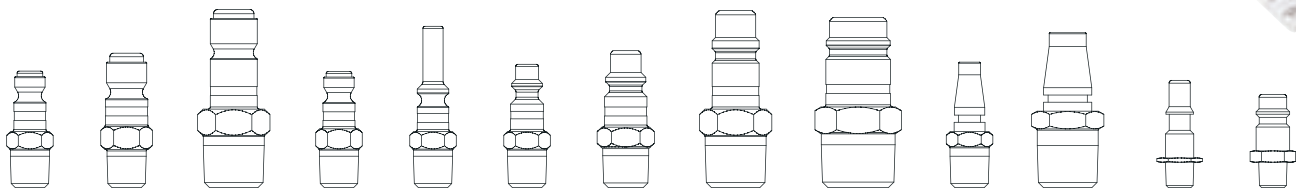

Pneumatic Lockout - All Purpose

Prevents pneumatic fitting from being connected to pressurized air source

- Fits virtually all male pneumatic fittings found in manufacturing facilities
- Stainless steel construction for corrosion resistance
- Measures 3.5 cm wide x 19.7 cm tall x 0.3 cm thick
- Accepts any Master Lock® or American Lock® Safety Padlock
- Works with lockout hasps for multiple worker lockout.

Order Ref.	Description
S3900-ML	Stainless Steel Pneumatic Lockout

Steering Wheel Covers

Provides Visual Deterrent for Vehicle Maintenance

- Three sizes available for various diameter steering wheels – 46.6 cm, 50.8 cm and 61 cm
- Trilingual warning notifies employees not to start or move vehicle
- Lock in place with a 421-ML hasp and safety padlock
- For added security, use Safety Series™ 8611-ML lockout cable around steering wheel and foot pedals.

Three sizes available

Popular on Forklift Trucks

These steering wheel covers are available in various sizes and are ideal for locking out and tagging out forklift trucks. Visit our website for more information.

Large Electrical/Pneumatic Lockout

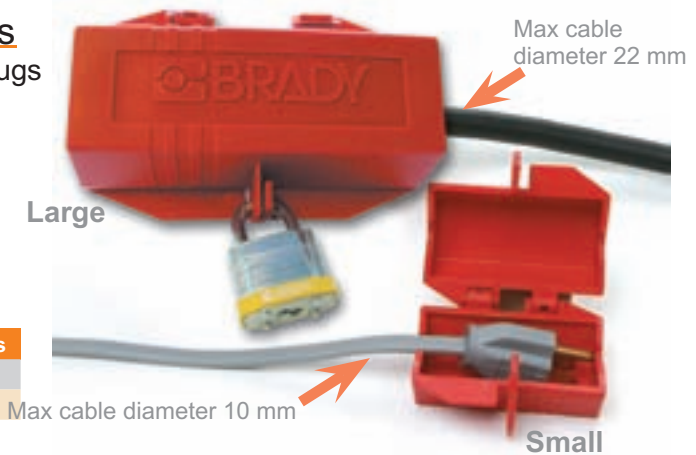

- Accommodates a large variety of electrical plugs up to 89 mm diameter and 127 mm in length as well as male air hose connectors
- Works on 110V, 220V and 550V plugs
- Made of Polystyrene material
- **4 padlocks can be applied**
- Max. shackle diameter : 7 mm
- Min. shackle clearance: 20 mm
- Packaging: 1 piece

Order Ref.	Description
800126-BR	Large Electrical/Pneumatic Lockout

Lockout Devices for Plug Connections

- Especially developed to secure all types of plugs
- Highly effective against the unauthorised or incorrect use of electrical equipment
- Simple to use
- Max. shackle diameter: 7 mm
- Min. shackle clearance: 20 mm
- Packaging: 1 piece

Electrical Risk: Plug Lockouts

Electrical Plug Lockout

Outward/Inward Rotation Allows for Easier Application & Storage

- Surrounds the electrical plug; protects against accidental reconnection
- Unique, patent-pending rotating design allows for easier installation in confined space applications
- Complete with high-visibility permanent safety labels (English, French & Spanish). Labels can be written-on to identify the responsible person, then erased for the next job
- Tough, lightweight, dielectric Zenex™ thermoplastic bodies withstand chemicals; perform effectively in extreme conditions (temperature range -47°C to +177°C).

Order Ref.	Description	Dimensions
487-ML	Electrical Plug cover small – 120 and 240 volt plugs	10 x 11 x 7 cm
488-ML	Electrical Plug cover large – 240 and 250 volt plugs	19 x 13 x 9 cm

Small Electrical Plug Lock-out

Order Ref.
S2005-ML

Compact design locks out smaller plugs easily & effectively

- Locks on the US prongs of 110-120 volt plugs
- Fits 2 prong plugs with and without earth.

Push Button and Rotary Switch Cover

- Prohibits access to a switch or control
- Fits both 30.5mm and 22.5mm diameter switches
- Clear bases and cover allow visibility of nameplates and labels
- Master carton qty 1. Commercial packaging.
- Patents pending

Order Ref.	Description
S2151-ML	Removable Push Button and Rotary Switch Cover
S2153-ML	Permanent Push Button and Rotary Switch Cover

Oversized Plug & Hoist Control Cover

Effectively locks out all sizes or large electrical connectors and hoist controls

- Patent pending lockout, the cinch sack offers broad application solutions
- Insert PVC tubing to block access to hoist control buttons
- Lock out with up to 6 padlocks or hasps.

Order Ref.	Description	Dimensions
453L-ML	Nylon Oversized Plug & Control Lockout	482 x 165 mm
453XL-ML	Nylon Oversized Plug & Control Lockout	660 x 254 mm
453XXL-ML	Nylon Oversized Plug & Control Lockout	914 x 356 mm

Zenex™ is a registered trademark of Master Lock®.

Electrical Risk: Circuit Breaker Lockouts

Universal Multi-Pole lockout works with most two or three pole breakers utilising a tie-bar.

Universal Multi-Pole Breaker Lockout

- Made of durable impact-modified nylon
- Compatible with GE, ITE, Sylvania, Challenger, Bryan, Westinghouse, General Switch Co. ...
- Use thumbscrews to clamp lockout securely over tie bar, then insert lock to prevent clamp from being loosened
- Max. shackle diameter: 7 mm
- Min. shackle clearance: 20 mm

Order Ref.	Packaging
066321-BR	1 piece
066320-BR	6/pk

Combine Circuit Breaker Lockouts with Safety Padlocks (page 30)

Economy Multi-Pole Breaker Lockout

- Economical solution!
- Designed to fit multi-pole breakers
- Quick and easy to apply
- Max. shackle diameter: 7 mm
- Min. shackle clearance: 20 mm

Order Ref.	Description
805814-BR	Economy Multi-Pole Breaker Lockout

Single Pole Circuit Breaker Lockout

- Designed for breakers that have holes in the switch tongue
- Quick and easy – just snap in place and apply lock
- Dual cavities accommodate different size switch tongues
- Dimensions (H x L x W): 21 x 9 x 55 mm
- Max. shackle diameter: 7 mm
- Min. shackle clearance: 20 mm

Order Ref.	Packaging
065387-BR	1 piece
065688-BR	6/pk

“No Hole” Circuit Breaker Lockout

- Extremely versatile – works on wide range of single-pole and internal-trip multi-pole breakers
- 2 sizes: one for 120-277V breakers and one for 480-600V breakers
- Made of rugged polypropylene and glass filled impact modified nylon
- Use thumbscrews to damp lockout securely onto switch tongue, then pull cover over thumbscrew and lock in place to prevent clamp from being loosened
- Max. shackle diameter: 7 mm
- Min. shackle clearance: 20 mm

Order Ref.	Description	Max. Switch width	Packaging

065965-BR	277 Volt Device	38 mm	6/pk
065397-BR	480-600 Volts Device	16 mm	1 piece
065966-BR	480-600 Volts Device	16 mm	6/pk

How to apply:

Covering a breaker with a piece of duct tape to “lock it out” isn’t safe or effective and certainly doesn’t satisfy legislation. A lockout device gives you a new level of safety and compliance.

Electrical Risk: Circuit Breaker Lockouts

Miniature Circuit Breaker Lockouts

- Mini Circuit Breaker Lockout to safely and effectively lock all European equipment
- The Mini Circuit Breaker Lockout is simple to use and quick to apply
- Works with all Master Lock Safety padlocks and lockout hasps.

Rapid Delivery

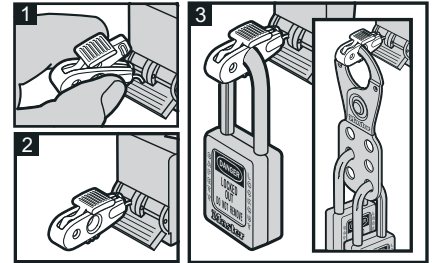

S2390-ML

Fits breaker with toggle openings 11mm or less

S2391-ML

Fits breakers with toggle openings over 11mm

MCB-NOTOOL

Universal "No Tool" Circuit Breaker Lockout

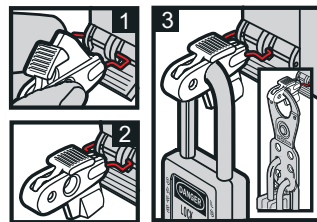

This convenient solution universally fits miniature circuit breakers and can be easily applied to the toggle by tightening the screw.

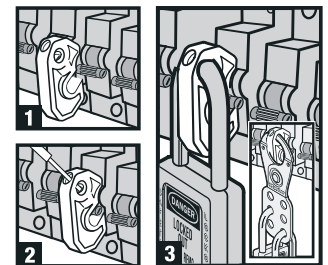

S2392-ML

Fits breaker with pin-in toggles

S2393-ML

Circuit Breaker Lockout Kit

An Ideal Lockout Kit for personal use by electricians – a must have in their toolkit!

Each kit contains a variety of safety products essential to ensure an individual can safely 'lockout' on the job e.g non-conductive padlocks and lockout hasps, a variety of circuit breaker lockouts compatible with most circuit breakers on the market, safety tags etc.

Electrical Risk: Circuit Breaker Lockouts

Master Lock® offers innovative, devices for the effective lockout of electrical shut-off points, including circuit breakers, electrical plugs and wall switches.

Grip Tight Circuit Breaker Lockout

Greatest Hold Strength Combined with Universal Fit

- Secure and simple mounting for a solid lockout. Grips tight with simple thumb screw and clamping handle
- Exclusive design accommodates virtually all styles of breaker toggles
- Narrow profile permits side-by-side breaker lockout
- Both devices accept all American Lock® safety and Master Lock® padlock shackle and lockout hasp diameters
- Durable construction with powder coated steel and reinforced polymer allows operation in harsh environments.

Order Ref.	Description	Dimensions
491B-ML	Circuit Breaker Lockout - tall and wide toggles	7 x 13 x 2 cm
493B-ML	Circuit Breaker Lockout - std. single and double toggles	7 x 13 x 3 cm
506-ML	Set of each device - one 491B-ML and one 493B-ML	

Circuit Breaker Switch Padlock

Provides the Flexibility to Effectively Lock Out Breaker Switches

- 0.5 cm diameter cable shackle allows padlock to properly lock all types of circuit breaker lockout devices
- Flexible cable allows the compact lock body to be positioned so that the control panel door closes properly
- Fits the tight space constraints within circuit breaker shutoff boxes.

Custom Lockout Kits

As the safety needs of each worker within a company can vary, Lockout Tagout Safety Ltd, provide a custom lockout kit option. This allows personalised pouches/bags to be created containing only the useful aspects of an 'off-the-shelf' kit specific to your workplace. A variety of padlocks, tags, hasps and other specialised safety equipment may be included in these kits.

For more information on how to build your own custom lockout kit please call 01642 244017 or email us at info@lockout-tagout.co.uk and let us know which equipment you require. If you are unsure as to which equipment you may need to comply with safety legislation, we can arrange on-site visits to give you some advice.

5 Steps to help you choose the locks you need

1. Define which type suits best the application, use the below chart to help you out.
2. Define height and diameter of shackle (you will find this info with each lockout tagout device in this catalogue)
3. Choose a key system: Keyed Different, Keyed Alike, Master Keyed.
4. Choose the colour of the padlock.
5. Decide if the lock needs to be engraved or not.

Choose the lock that's best suited for the job!

	Safety Padlock	Brass Padlock	Aluminium Padlock	Steel Padlock
Compact, lightweight	✓	✓	✓	
Nonconductive body & keyway	✓			
Most corrosion resistant	✓	✓		
Most spark resistant	✓	✓		
Most tamperproof	✓		✓	
Most rugged			✓	✓
Custom keying	✓		✓	✓

*Only available as custom

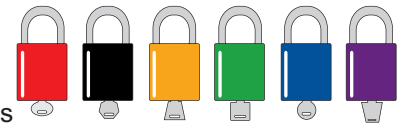

Keying & Charting Options

Keyed Different

Padlocks are usually supplied “keyed differently” when purchased from stock.

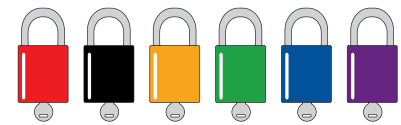

This means that the key for one lock should not open another. These padlocks use 5- or 6-pin cylinders to offer high levels of safety and security. Both cylinders and keys

are precision-machined to exacting standards. This enables us to offer a greater number of unique keys than other locks with the same number of pins, making it highly unlikely that you will ever receive a duplicate lock. To guarantee that each lock is different, we can chart your locks, ensuring that each padlock you receive is different from the others.

Keyed Alike

When keyed alike, all locks in a set can be opened with the same key. This option is beneficial when multiple locks are assigned to a single employee.

Master Keyed

A master key can be used to open multiple locks that are keyed differently.

This allows supervisors to easily remove a lock in the event of an emergency.

In order for employees to retain exclusive control, master keys should be kept in a secure location that is accessible only to management.

Grand Master Keyed

The master key system can be extended to several teams. This way each team has a master key and all the locks of all the teams can be opened by a ‘Grand’ Master Key if necessary.

Locks, Hasps & Accessories: Padlocks

Zenex™ Safety Padlocks

Optimal safety padlock designed exclusively for Lockout/Tagout. Distinctive Zenex™ Safety padlock is durable, standardized, substantial and identifiable for OSHA 1910.147 compliance. Stands up to chemicals, temperature extremes and is UV stable.

Zenex™ is a registered trademark of General Electric Corporation.

- Temperature tested from -47° to 177° C
- Excellent Chemical resistance
- Excellent corrosion resistance
- UV stable
- No silicone used in padlock
- Over 101,000 unique safety key codes available
- Over 1 million possible codes with optional key cylinders
- Keyed Different, Keyed Alike and Master Keyed options
- Key retaining – ensures padlock is not accidentally left unlocked
- Includes one key to ensure compliance with OSHA guideline of «1 employee, 1 padlock, 1 key»
- Available in 8 colours
- Body sides and face can be laser engraved for permanent identification
- Sealed keying system ensures your safety lockout system stays pure by preventing haphazard rekeying and the accidental introduction of duplicate key codes.

S31-ML - Zenex™ Lock-out Padlock

Locks, Hasps & Accessories: Lockout Hasps

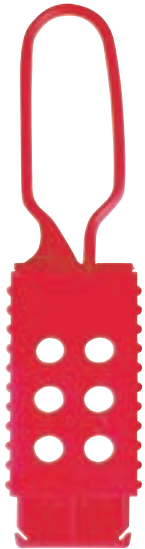

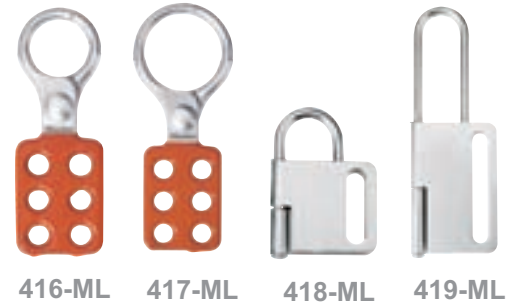

Lockout hasps are integral parts of a successful safety lockout program, providing effective multi-person lockout.

Safety Lockout Hasps

Lockout by Multiple Workers at Each Lockout Point

- Attach hasp to isolation point
- Control cannot be turned on until last worker's padlock is removed from hasp
- Multiple styles available to fit most needs.

428-ML

Zenex™ Non-conductive hasp Body and Jaw in thermoplastic Zenex™: dielectric protection, non-conductive, anti-sparking. Ideal for electrical applications.

S430-ML

Suitable for isolation points less than 6 mm diameter.

S430-ML - 4 mm Zenex™ hasp

- Plastic Zenex™ body
- Can be locked out with 2 padlocks
- Performs effectively in extreme conditions temperature range. Withstands chemicals. U.V stable.

S431-ML - 4 mm Stainless Steel hasp

- Stainless Steel body
- Can be locked out with 8 padlocks

S431-ML

427-ML

Labeled Snap-on Hasp

- Combines multiple-person lockout and tagout identification
- Anodized aluminum and stainless steel construction for combined corrosion-resistance and strength.

Zenex™ is a registered trademark of Master Lock®.

Custom/Departmental Lockout Stations

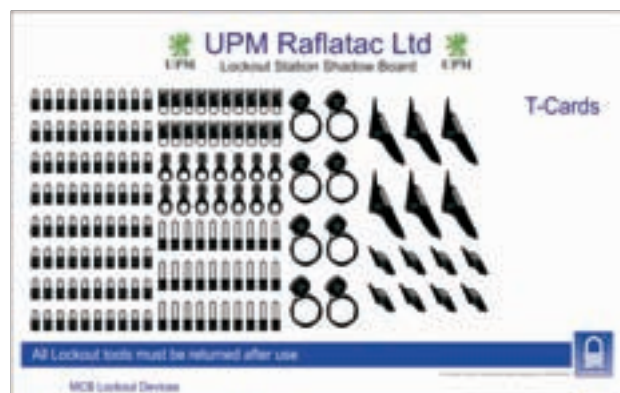

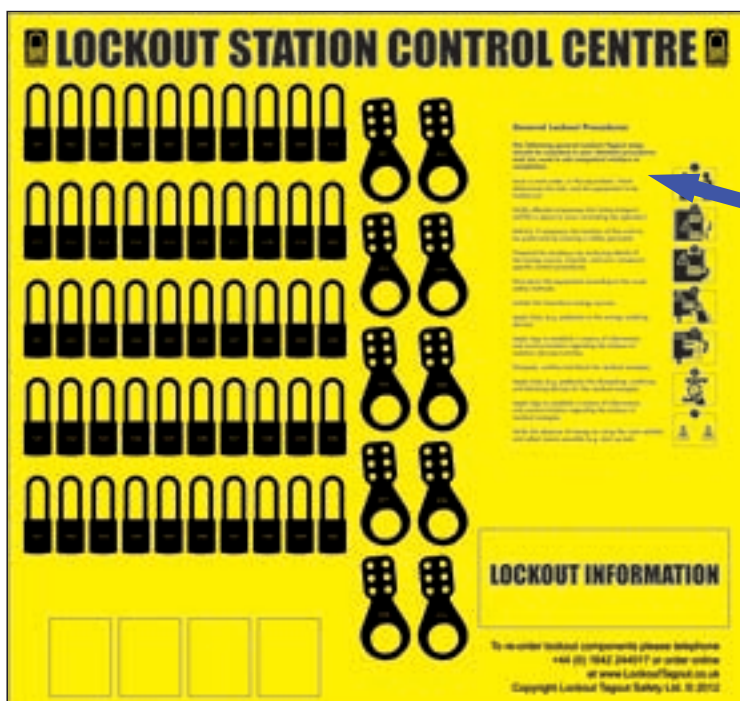

As the safety needs of each worker within a company can vary, Lockout Tagout Safety Ltd, provide a custom lockout kit option. This allows personalised lockout station control centres to be created containing only the useful aspects of an 'off-the-shelf' kit specific to your workplace. A variety of padlocks, tags, hasps and other specialised safety equipment may be included in these stations and a shadow effect allows easy visibility of when equipment is missing.

For more information on how to build your own custom lockout station please call 01642 244017 or email us at info@lockout-tagout.co.uk and let us know which equipment you require. If you are unsure as to which equipment you may need to comply with safety legislation, we can arrange on-site visits to give you some advice.

Power Plant No1 Choice

Steel Wall Mounted or Portable Key Group Lockout Box

The steel group lockout tagout boxes shown here are in stock and available for immediate delivery or shipout to areas anywhere in the world. Don't see the lockout box that you need? We can customize or design a prototype to your specifications.

Case and hooks are constructed of steel for long-lasting durability.

Optional carrying handles are available for most logout tagout box models and allow for either portable or stationary use.

Mounting holes allow mounting the lockout box to a wall or equipment.

Spring loaded retainer bar holds keys in place while carrying and prevents key removal by shaking in inverted position.

Clear acrylic window provides good visibility of keys and tags.

Interior chart holder is provided on most lockout box models for your company's lockout/tagout forms.

Durable red powder paint is used on the lockout box and handle. Key holders are painted white.

Order Ref.	Description	Dimensions (WxHxD)
Model GL-1/2	Lockout box 4 hook	300mm x 275mm x 75mm
Model GL-1	Lockout box 8 hook	315mm x 440mm x 75mm
Model GL-2	Lockout box 24 hook	450mm x 500mm x 75mm
Model GL-3	Lockout box 50 hook	150mm x 240mm x 75mm

A range of cabinets to control and track keys. Effective key management and secure storage is an essential part of any organisation's security strategy. Our range of key control systems, the most comprehensive available, is manufactured and tested to the highest standards, making them ideal for safeguarding against lost or stolen keys even within high security commercial applications.

Alternative Locking Options

Unless stated the cabinet will be supplied with key locking as standard. The type of lock will depend upon its position within the range. Securiskey recognise that there may be a requirement to add or alter the standard locking configuration. It is for this reason we offer the following alternatives.

A ELECTRONIC LOCK WITH AUDIT TRAIL
Full function lock with multiple user codes, audit trail and time locking to prevent unauthorised entry during specific time zones.

B DIAL COMBINATION LOCK
A combination lock used extensively in the safe industry. Offers in excess of 1 million combinations.

C ELECTRONIC LOCK
A heavy duty lock with versions available from Revo and La Gard depending upon personal preference. All with multiple user codes.

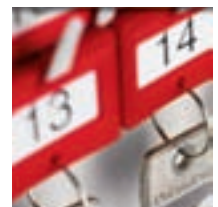

D PADLOCKING CAM LOCK
Designed to replace the standard Cam Lock, this option accepts a padlock with 8mm diameter shackle (max).

E MECHANICAL LOCK
A push button lock similar to those used extensively throughout offices in the UK. This lock type is available in both deadbolt and slam lock option.

F DIGITAL LOCK
The digital lock has a simple 10 button keypad and a # button which is used when programming. IP54 rated.

Images shown may not be indicative of the lock fitted

High Security Key Filing Systems

The ultimate tracking system.

Whether you need a simple key cabinet, a mechanised key control system or a sophisticated key issue and tracking system, our range of high quality storage cabinets help to maintain total accountability of large quantities of keys and help prevent unauthorised access within domestic, commercial and light industrial environments.

With a body constructed from 3 mm steel, as used in the manufacture of cash safes and a 6 mm steel slab door, the High Security cabinets provide unparalleled protection and are used extensively throughout the UK's prestige motor dealers, police stations and banks.

As standard the cabinets are secured with a three-way locking mechanism, shooting 20 mm bolts and using a VdS approved lock, although you have the option of fitting an electronic locking system. They also include adjustable hook bars, clever key tags as with the System cabinets and Vaults. The High Security cabinets are also available in a deeper model for the storage of bunches of keys.

Floor Standing Systems are larger capacity key cabinets and their key panels are on telescopic slides for easy access and storage.

Key Control Systems: Key Vault

Key Vault

Advanced key management.

Large Order? Call for Quote!

Designed to meet the requirements of insurance companies in the control, tracking and security of keys associated with risk to valuables or property, our range of Key Vaults offer twice as much security and strength provided by standard key cabinets. Constructed from 2.5 mm fabricated steel with a 3 mm flush closing door which includes removable hinge pins for easy upgrading, they are ideal for commercial use. These cabinets are also supplied as standard with a half euro profile cylinder that can be upgraded to integrate with an existing master key or security system. As with the System cabinets, the Key Vault has adjustable hook bars, a removable control index, sign-out tabs (to record a paper trail of key usage) and is also available in a deeper model for the storage of bunches of keys.

System Cabinets

Affordable key control.

Constructed from 1.5 mm pressed and folded steel and secured with a choice of five locking options, the cabinets provide the space to store and track up to 600 keys and include adjustable hook bars to accommodate different key lengths. Each model is finished in a robust powder coat paint finish (RAL 7035) and has a removable control index for out-of-hours peace of mind, colour-coded hook bars and tags to ensure quick identification, both of which are numbered.

For larger requirements, our range of deep system cabinets provide the extra space required to accommodate bunches or a mixture of bunches and individual keys and are available with 48, 100 or 200 hanging hooks.

These cabinets are best suited to domestic and commercial use for key control and tracking.

Key Control Systems: Security Systems

Security Systems

PADLOCK SECURITY SYSTEMS: Specially designed to house padlocks and keys used to isolate switchgear or machinery, this system is available in three sizes, providing ample space for up to 100 keys. As standard, the system is fitted with extra deep hooks, staggered and spaced 60mm apart, and includes a Securikey cam lock although alternative mechanisms are available.

Locking Options - See Page 50: A B C D F

KEY VIEW SYSTEMS: As well as all of the features and benefits associated with our system key cabinets, Key View also has a plexi-glass front allowing users a clear visual check of all stored keys without the need for unlocking the door. The system is available in three sizes, with space for between 24 and 50 sets of keys.

Locking Options - See Page 50: D F

System 50 G-SK

Off Shore No1 Choice

EMERGENCY KEY HOLDING BOXES: Of steel construction with a 2mm breakglass front, Securikey's Emergency Key Boxes are designed to hold a restricted key near to a locked door in case of emergencies. Locking options are cylinder lock, padlocking cam lock. The Model KO comes with a security seal and a chained hammer.

Cable Seals: Cable Lock and Breakaway Seals

Cable Lock Seals

Cable seals are available in packs of 100, 500 or 2000. There are three different available lengths (18cm, 60cm and 100cm) although custom lengths may be requested. Several colour options - Red, Gold, Self-Colour, Green and Blue. The cable lock is anodised in solid colours, which accommodate customised laser marking. Anodising also makes colour coding possible and eases identification from a distance.

Ideal for long term uses, each cable seal is self locking so once the cable passes through the body the only way to remove it is by cutting. Cable Locks are widely used on Trucks, tanker trucks, air cargo containers, shipping containers, rail cars, calibrators and valves. The one-way locking mechanism provides fast and easy sealing. One end of the cable is permanently secured into the locking body.

All seals are individually numbered to prevent tampering and allow easy identification. All cable locks are etched with permanent laser marking for name, logo, sequential numbers & barcode. Laser marking offers the highest level of security as it cannot be removed or replaced. Parts of the exterior have been designed with a rib pattern, which protects the markings during rough handling.

Order Ref.	Description
2.5MinCabSeal-MF	2.5 mm Mini Cable Lock Seal
3.0MidCabSeal-MF	3.0 mm Midi Cable Lock Seal
3.5MidCabSeal-MF	3.5 mm Midi Cable Lock Seal
5.0MaxCabSeal-MF	5.0 mm Maxi Cable Lock Seal

Don't forget to specify the colour, length and number of cable lock seals you require from the options below:

1. Colour	2. Length	3. Number
Red	18 cm	100
Gold	60 cm	500
Self Colour	100 cm	2000
Green		
Blue		

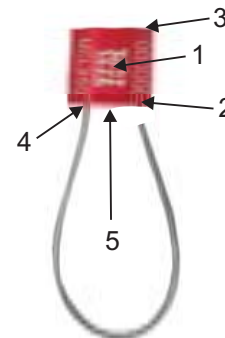

Cable Breakaway Seals

Features -

1. The cable breakaway seals are etched with permanent laser marking. Laser making offers the highest level of security as it cannot be removed or replaced.
2. The exterior has been designed with a rib pattern, which protects the marking during rough handling.
3. The cable breakaway seals are highly suited to securing valuables for longer periods of time because of its simple yet very efficient locking.
4. One end of the cable is permanently secured into the locking body.
5. The cable breakaway seals are all anodised in solid colours which accommodate customised laser making. Anodising also makes colour coding possible and eases identification from a distance.

DOMINOSP-MF Indicative Seal

Colour coding is enabled through different coloured caps and base of seals.
Domino SP seals are etched with permanent laser marking for name, logo, sequential numbers & barcode. Laser marking offers the highest level of security as it cannot be removed or replaced.
Heat staking is deployed to permanently bond caps and sealing.
Alignment holes ensure easy inspection of proper sealing.
The strong and durable metal strap can withstand harsh handling and the climatic elements in a long-haul shipment.
Quantities: 1000, 5000, 25000

Order Ref.
DOMINOSP-MF

DRAGONWP-MF Indicative Seal

The Dragon Seal WP is etched with permanent laser marking for name, logo, sequential numbers & barcode. Laser marking offers high security because it cannot be removed or replaced.
Ultrasonic welding technology is used to fasten caps to the seals. Ultrasonic welding cannot be cut or forced open without leaving clear evidence of tampering.
Metal clip locking provides better locking and greater pull strength to the long, thick strap.
The ribbed pattern on the seal cap and locking body is an extra security feature that provides clear evidence if the seal has been cut or tampered with.
Quantities: 1000, 5000, 10000

Scafftags®: Microtag

Microtag is a safety system which is particularly useful for identifying small plant equipment & lifting gear. It also forms a clear and highly visible harness safety system which is attached by cable ties in two places. To display latest status, simply attach a tag to the harness and lanyard using the nylon ties. Before inspection, holder displays a "DO NOT USE EQUIPMENT" warning. Microtag® Kit contains 20 Holders, 40 Cable Ties and 1 Pen. Inserts available in 3 colours for your colour-coding needs. Inserts are not included in this kit but are sold separately and featured to the right.

806727-BR 806731-BR 806735-BR

Scafftags®: Laddertag

Scafftag Laddertag Kit (10 Holders, 10 Inserts & 1 Pen)
Monitor inspections and legal compliance with unique tagging system on ladder status
Display information about ladder class and inspection periods and due dates on robust, highly visible tag
Serves as a quick reference and checklist on ladder inspection
Replacement inserts available and are featured to the right.

Order Ref.
806711-BR

806715-BR

Scafftags®

This Scafftag Kit for system scaffolds efficiently manages your inspection procedures. The unique holder and insert system provides instant feedback of scaffolding status. Caution: Fit Scafftag® at all legal access points (normally ladder access) from initial set-up to dismantling. Three insert designs available: Standard Inspection, Prohibition, and colour-coded (to indicate different loadings). Holder displays a "DO NOT USE SCAFFOLD" warning during erection, inspection waiting, failure and dismantle stages. Scafftag® Kit contains 10 Holders, 20 Standard Inspection Inserts and 2 Pens. Replacement inserts sold separately.
